

YSLYCY-JB

Application and Description

For use as a data and control cable in Machinery, computer systems etc. as well As a signal cable for electronics. The high level of screening ensures a high degree of interference protection. The screening density assures distur-bance-free transmission of all signals and impulses. The PVC-inner sheats of those cables raise the mechanical stress. The applied clear transparent PVC outer sheath accentuates, the optical view of the tinned copper braid. These cables are suitable for flexible use for medium mechanical stresses with free movements. The dense screening assures distur-bance.free transmission of all signals and impulses. An ideal disturbance-free control cable for the above application.

Cable Construction

- Flexible bare copper strands
- Strands to IEC 60228, EN 60228, VDE0295 class 5
- Spezial PVC Z 7225 insulation
- Core colour coded to JB/OB
- Green-yellow earth core in the outerlayer (3 cores and above)
- Cores stranded in layers with optimal lay-length
- Spezial PVC inner sheath
- Tinned copper, braided screen, approx.85% coverage
- Transparent spezial PVC outer sheath

Technical Characteristics

- Spezial PVC control cables, adapted to E DIN VDE 0245, 0281 part 13
- Conductor resistance To DIN VDE 0295
- Working Voltage: U_o/U 300/500 V to 1,5 mm² U_o/U 450/750 V at 2,5 mm²
- Test voltage: 4000 V
- Minimum bending radius: 10-15 x Ø
- Operation temperature rage: -40 °C to 780 °C(static) -5 °C to 80 °C(flexing)
- Insulation resistance: mind. 20 MOhm x km
- Mutual capacitance according to different cross-sections 0,5mm² to 2,5 mm²
core/core (approx. 150 nF/km) core/screen (approx 270 nF/km)
- Coupling resistance max. 250 Ohm/km
- Radiation resistance: up to 80 x 10⁶ cJ/kg (up to 80 Mrad)

Cable Parameter

AWG	No. of Cores x Nominal Cross Sectional Area # x mm ²	nominal outer-ø mm	cable weight kg/km	copper weight kg/km
