

H05G-K / H07G-K

Application and Description

These cables are recommended for the internal wiring of switchboards and distributor boards as well as in operating parts in or on lights. The higher temperature range allows for connections to heaters with an alternating nominal voltage of 1000V. or direct nominal voltage of 750V. These cables are all allowed for laying in tubes in and under plaster.

Standard and Approval

NF C 32-102-7, CE Low Voltage Directive 73/23/EEC and 93/68/EEC, ROHS compliant
